
Camley Street

Neighbourhood Forum

TEND THE GARDEN, TAKE THE FRUIT!

Be part of our new vision and let's make Camley Street the greenest in the city together!

Under the Localism Act, a community can come together and plan what will happen in their area. On Camley Street the residents and businesses have formed the Camley Street Neighbourhood Forum and we are busy developing our plan. Part of our vision is to make Camley Street the greenest street in Central London by integrating agriculture, manufacturing and digital technology together.

To achieve this we will continue to expand the food growing areas on Camley Street interweaving it around and over the manufacturing units. We also believe we can develop real jobs tending these areas with enough income being generated by selling the produce to self-fund the jobs. This food growing enterprise we have named Camley Street Farm

What is for sale today has been grown or been produced from things grown on Camley Street and the income generated will pay for Saturday jobs that have tended and developed the produce.

We really hope that you like what we are doing and thank you for your support and custom. If you buy from Camley Street Farm, you support the sustainable future!
